Open Distro Kibana Reports

Welcome to your Cauldron.io Workspace

This space is for visualizing the project you selected before. The visualizations you create here are shared among all your projects. We have included a set of dashboards but we encourage you to change these default assembly of visualizations to what you need.
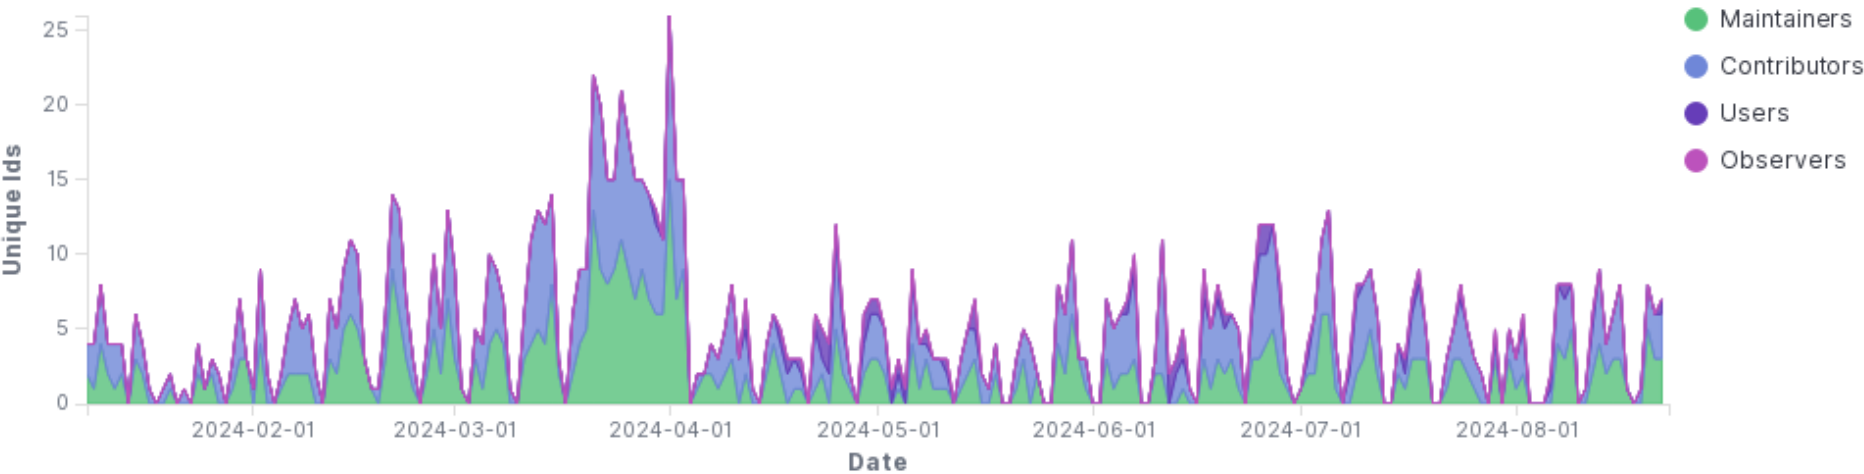

For now you can not **share** dashboards you have created here, but you can share a link with our fancy dashboards with your data. You can obtain that link from your project page.

Enjoy brewing your potions (i.e., explore your data)!

I don't know where to start!

- User Guide and Documentation
- How to produce specific visualizations and metrics.
- Ask questions, get help, and help others.

Quick Tips / Troubleshooting

- **If you see no data at all**, please double-check the time range selected on the right-hand side of the search bar.
- Almost every chart allows you to click or drag and drop to generate filters and drill down the data.
- Sharing button in Kibana doesn't work for now, only public Cauldron visualizations are available for sharing. Go to your project page and copy the "Public dashbord link".
